

## STONECHIP SPRAY

**RUST STOP**

**HIGH FILLING POWER**

**FLEXIBLE**

**SOUND ABSORBING**

**HARDNESS**

CAR-REP STONECHIP SPRAY provides effective protection for car parts that are susceptible to stone chipping. Thanks to its rubbery consistency, it is an excellent protector against chipping and rusting. It also has a soundproofing effect. Car-rep Stonechip can be painted over with most car paints.

Preparation: the surface to be painted has to be clean, dry and free of any grease. Make sure you protect adjacent surfaces not to be painted by covering them. To test paint compatibility, try out the paint first.

Attention: shake the bottle for at least 2 minutes, even after the mixing granules have come loose from the bottom of the bottle, and also occasionally during painting. When painting, keep the bottle in its upright position, at the distance of ca 30 cm from the treated surface. For optimum results: apply 2-3 thin layers to the surface. Let dry between layers for 3-5 minutes, but not more than 30 minutes. To clean the nozzle, turn the bottle upside down and spray until only compressed air is coming from the bottle. It is recommended to wear protective clothing and goggles when painting.

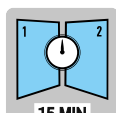

**CLEAN WITH BRUSH**

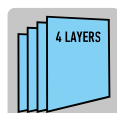

**3 MIN SHAKE**

**25 CM SPRAY DISTANCE**

**15 MIN TIME BETWEEN LAYERS**

**4 LAYERS**

**CLEAN UP**

**1H TOUCH DRY**

**ALL PAINTS AFTER 3H OVERPAINT**

**RUBBER SOLVENT BASED**

**STORAGE STABILITY:** 60 months

**SIZE:** 500ml

**SALES QTY:**  
500ml: 6 pcs
