### HARDNESS

Car-Rep® Underbody coating spray is a quick-drying bitumen-based protector for your car's chassis. It is flexible, hard-wearing, and provides excellent protection against rust. Instructions: Clean the surface carefully. Cover all surfaces that do not require treatment. Shake the container for approx. 3 minutes before use. Spray from a distance of approx. 30 cm. Spray several thin layers, letting the paste dry in between sprayings. This will give an even and protective result. Shake the container during the process to keep the paste liquid and spreadable. Clean nozzle after use: turn container upside down and press the nozzle until only propellant comes out. Drying time Approx 2 h at +20 °C.

SIZE: 500ml
