

PLASTIC PRIMER

MASTON PLASTIC PRIMER is a transparent primer especially developed to be used on different plastics before painting, excluding very soft plastics such as polystyrene. The plastic primer works as a “chemical sandpaper” and creates an invisible, microscopic structure on plastic surfaces. The structure and the bonding additives promote the adhesion of the paint on plastics. The primed surface can be overpainted with any primer or paint. We recommend testing the suitability of the primer first on an invisible area.

STORAGE STABILITY: 60 months

SIZE: 400ml

SALES QTY:
400ml: 6 pcs

USAGE INSTRUCTIONS:

When using the product indoors, ensure that the area within at least a 5-meter radius of the painted object is protected. Paint dust is lightweight and can spread over long distances through ventilation.

RECOAT:

always, 5 minutes in between layers
