

PAINT 2K PU GLOSS 720ML

Maston 2K PU Paint is a premium 2-component polyurethane with aliphatic isocyanate resin. Developed for painting vehicles and other transportation equipment, it creates a remarkably hard, high-gloss surface that provides exceptional resistance to UV radiation and mechanical stress. Its superior formula ensures surfaces stay resilient, maintaining their gloss while delivering a durable finish to withstand the challenges of time and use. To be used with Maston 2K PU Paint and Lacquer hardener

Pot life: 3 hours after the hardener (2) has been added to the paint part. Open the hardener container carefully, as a small amount of pressure can build up in the container during storage.

1. Surface Preparation:

- The surface to be painted must be sanded or roughened, clean, and dry. Before painting, use a grease remover to clean the surface.
- Ensure that the temperature of both the surface and the air is above 10°C.

2. Mixing:

- Stir the paint and hardener thoroughly before adding any components.
- Once the hardener is added, mix until you achieve a homogeneous mixture.
- If thinning is necessary, use only Maston PU thinner (conventional thinners cannot be used).

3. Application:

- When using a spray gun, the recommended nozzle size is 0.011 - 0.013 inches.

4. Safety:

- The paint's hardener and the finished mixture contain isocyanates. It is recommended to use a fan respirator, especially if ventilation is insufficient.
- For intermediate and short-term use, a respirator with an A2-P2 combination filter can be used. Always ensure proper protection for the face and eyes when using a respirator.

Coverage 10l/ m², dust dry in 1 hour, touch dry in 8 hours, final hardness 8 days after painting. Can be overpainted after 12 hours (recommendation max. 2 coats).

To ensure extreme durability and gloss, we recommend to clear coat the painted surface with Maston 2K PU Clear Coat.

DEGREE OF GLOSS (DIN 67530 60 °):

gloss 80-100 gloss units

SIZE: 720ml

SALES QTY:

720ml: 2 pcs
