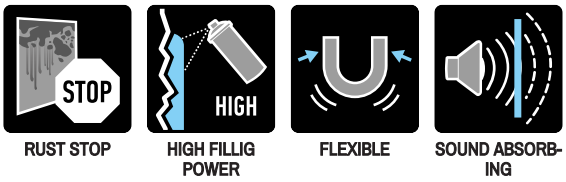
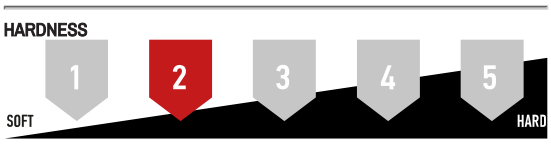
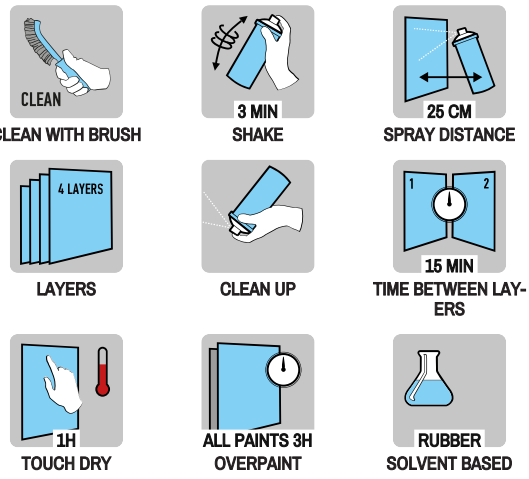
STONECHIP







MASTON STONECHIP SPRAY provides effective protection for car parts that are susceptible to stone chipping. Thanks to its rubbery consistency, it is an excellent protector against chipping and rusting. It also has a soundproofing effect. Maston Stonechip can be painted over with most car paints.

STORAGE STABILITY: 60 months

SIZE: 500ml

SALES QTY:
500ml: 6 pcs

USAGE INSTRUCTIONS:
Instructions: Carefully clean the painted surface you wish to treat. Cover all surfaces that do not require treatment. Shake the container for approx. 3 minutes before use. Spray from a distance of approx. 30 cm.
Spray several thin layers, letting the paste dry in between sprayings. This will give an even and protective result. Shake the container during the process to keep the paste liquid and spreadable. Clean nozzle after use: turn container upside down and press the atomizer until only propellant gas / air comes out.
For stain removal we recommend Maston Thinner. Drying time at +20 °C: touch-dry in approx. 30-60 min., ready for repainting in 1-2 h.

RECOAT:
Repainting: Before repainting, ensure that the paste is completely dry and properly adhered to the treated surface
