

GLASS FIBRE MAT 150G - 0,5M²

Maston fiberglass mat is intended for hand lamination together with resin it is used in car body repairs and in the manufacture and repair of caravans and boats.

Glass fibre mat in combination with polyester resin is ideally suited for laminating and repairing big damages on car bodies, boats, yachts and caravans. Often used in renovations and structural repairs for patching and gluing holes or defects on various types of materials, such as metals and plastics.

Can also be applied on elements already covered by clearcoat. Creates durable laminates with great mechanical strength and resistant to petrol, oils and greases. Features good resistance to short term exposure to high temperatures (up to 70°C). Do not apply directly on wash / etch primers, 1K acrylic and nitrocellulose products.

SIZE: 150g
