Spray at distance of about 25 cm from surface and move the spray slowly on the object. Spray a thin layer first to improve adhesion. Let dry between layers for 3-5 minutes. Thereafter apply 2-3 thin cross layers on the surface and let dry. Repeat if necessary. Drying time: Touch-dry 10-20min. Totally dry 24 hours. Clean the nozzle by turning the can upside down and spray until only propellant comes out.

When using the product indoors, ensure that the area within at least a 5-meter radius of the painted object is protected. Paint dust is lightweight and can spread over long distances through ventilation.
