

## RUST EATER

**SAFETY GEAR**

**COVER AREA**

**DIRECT TO RUST**

**WAIT 10-15 MIN**

**WIPE OFF**

**WASH WITH WARM WATER**

**LET IT DRY**

**ALL PAINTS OVERPAINT**

Rust Remover Gel is ready-to-use, high-quality, fast-acting phosphoric acid gel for the effective removal of rust and oxidation. Its gel-like consistency adheres well even to vertical surfaces, making application easy and precise.

Effectively removes rust and oxidation without damaging the underlying metal. Also suitable for use on brick, wood, fiberglass, and plastic surfaces without causing damage.

**Directions for Use:**

Apply the gel directly to the rusted area. Allow it to work until the rust has dissolved into the gel. Wipe off the gel and rinse the treated surface thoroughly with warm water.

The phosphate coating formed during treatment provides an excellent surface for painting and oiling, improving adhesion and protection.

Note: Not suitable for use on aluminum, silver, gold, copper, or brass.

**SIZE:** 1l

**SALES QTY:**

1l: 6 pcs
