

TEAK OIL SPRAY 500ML

THEORETICAL COVERAGE

WIDE SPRAY NOZZLE

QUICK DRYING

WEATHER-PROOF

Maston Teak Oil Spray is an easy-to-use protective and caring agent for treating any type of wood. Traditional and old fashioned formula of boiling linen seed oil for a long time gives Teak Oil Spray its unique ability to penetrate deep into wood and creating a protective layer without filming on the surface.

Teak Oil strengthens the wooden surface, restoring its natural tone. Ensures resistance to changing climate conditions and protecting effectively against moisture, dryness, bending and cleaving. Quick drying time makes the product ideal for protecting outdoor objects, such as wooden patios, wooden handrails and garden furniture.

WOOD

IN AND OUT

BINDER: Wood oil

STORAGE STABILITY: 60 months

SIZE: 500ml , other

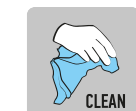

SALES QTY:

500ml: 6 pcs

other: 6 pcs

USAGE INSTRUCTIONS:

Instructions: The surface to be treated must be clean and dry, at temperatures + 15 °C and with moisture content of 80%. Shake before use. Spray directly on the surface to be treated. In case of old wooden objects, clean the surface thoroughly beforehand and polish/sand if necessary. NB! Previously untreated surface may require several layers in order to achieve an ideal end result. For regular care, one layer is sufficient. Shake the bottle for 1-3 minutes and spray the surface evenly at the distance of ca 25 cm, paying heed to the grain and the shape of the object. Leave to dry for 10 minutes and remove excess oil using a cloth. If necessary, repeat the procedure after the layer has dried. Before using the treated object, make sure the surface is dry. The surface will be completely dry on the following day at the latest. We recommend using protective clothing and goggles. Make sure to protect the surrounding surfaces not to be treated by covering these! The more layers you apply, the darker the end result will be.
